DETAILED ACTION

Reasons For Allowance

1. Claims 15-17, 30-36, 38-50, and 52-56 are allowed.

2. The following is an Examiner's statement of reasons for allowance:

The cited prior art taken alone or in combination fails to teach the claimed invention of selective delivery of audio or visual data by using a "multiple layer model" to recognize events in the data that should be delivered. Specifically, independent claims 15 and 43 teach the use of a "multiple layer model" to detect events in audio or visual data to select what audio or visual data to deliver. Since Applicant uses the term multiple layer model, Examiner reads this to mean a multilayer perceptron, instead of multiple layers of models, since Applicant did not disclose multiple models, but rather one model with multiple layers. The standard way of doing this in the art is with a multilayer perceptron.

The closest prior art of O'Hagan et al. (U.S. Patent Number 5,581,658 A; dated 03 DEC 1996; class 706; subclass 020) teaches an adaptive system for broadcast program identification and reporting, but fails to teach or suggest the use of a "multiple layer model" to detect events in audio or visual data to select what audio or visual data

to deliver. To the extent that this feature does not exist in the prior art cited by Examiner, the claimed invention is allowable over the art of record.

Any comments considered necessary by Applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
